## THE McBRAE GOVERNMENT AND LAND GRAFT

By H. F. G.

The Ministerial Union of the Lower Mainland of British Columbia have sent out a MacBride cry to the Dominion Government to help them by means of a Royal Commission to investigate the affairs of British Columbia. The Unionists say that the speculators be brought to justice and that the guilty parties, whether companies, syndicates, individuals, cabinet ministers or government officials who have shared in the plunder, be jailed and forced to disgorge. The Ministerial Union is a body of men and long-suffering men. It has no political goods to sell. In the year of MacBride's fall in British Columbia, left it in a state of alarm, bordering panic. Unless the grafting is stopped they see nothing but economic and social ruin for one of the most richly endowed provinces in the Dominion.

Their allegation is that the Province with the concurrence of leading members of the MacBride government has been partaking in the grafting of the land outlines of their province. The case is set forth in a pamphlet compiled by M. B. Cosworth, the English statistician, who has been several times called in by the MacBride Government as an expert, and who consequently knows his British Columbia like a book. Mr. Cosworth collected the data from the reports he was called in to tell the truth, but when he found his reports suppressed, his work on the Civil Service Commission choked off, and his own honor assailed by attempt to bribe him, he threw up his task in disgust and joined the reformers. In Mr. Cosworth's Ministerial Union have a splendid ally—he supplies the facts, figures and detailed knowledge, which back their charges beyond question.

Citizens of Canada were greatly disgusted with the strong-arm gang in Manitoba. Their work was coarse and callous. They did not even take the pains to hide their tracks well. They did not dare the public by practicing any Machiavellian arts of deception. When the people got onto the job and if ever once witnessed that get them out of the community after giving them their share of the sting to keep quiet. Nothing new or delicate about these methods—just plain assault with battery and high-way robbery with bold and unscrupulous of perjury thrown in for good measure. But what they did to Manitoba lesson it was, it is not a drumbeating to what happened in British Columbia.

Beside the British Columbia outfit blackguard of artists, hooligans and porch climbers, the Manitoba gang look like a band of Empress League engaged in and uplift meeting. Manitoba is working out its karmic debt to the public mind—if the Agricultural side is included, but what the busters did to British Columbia runs into hundreds of millions and then some. Sir Richard McBride appeared recently before the Davidson Commission at Ottawa and was pointed out what a patriot he was in purchasing a brace of steaming steamboats for \$180,000 more than the commissioners price—a hellish sort of arithmetic to ride along a long way towards explaining the present financial troubles of British Columbia. The people there have enjoyed that kind of arithmetic for the past ten years and have at last turned against Conservative government while costing it nothing but great friends and their own pockets. Premier McBride, as the son of a prison warden, began life in a jail and if a judicial investigation into the British Columbia scandal pans out as well as the Ministerial Union expects, it is not unlikely that some distinguished statesmen may spend a good part of their declining years in the same place.

The alienation of British Columbia lands as traced by Mr. Cosworth takes shape as a colossal crime which misleading statements by cabinet ministers, cooked statistics and false maps have failed to cover up. The

British Columbia people are asked to believe that there are over 90,000 acres of land surveyed and held for the preemptor alone; that 45,000,000 acres of this lies within three miles of a railway; that these lands are held for the speculators and that they are free to the settler who is given every assistance to get on the land. The actual facts, as ascertained by the Ministerial Union's enquiry, are these. There are perhaps 18,000,000 acres of available agricultural land in British Columbia of which ninety per cent is held by speculators and land gamblers. Those Prairie's hard-bit sons,

## Sons of the Prairie

"They are lost, our guns, to the conquering Huns."

"Lost?" "Tell us tell us?"

In the lingo's test of the grim Far West,  
"Tis a word we do not know."

And they gritted their teeth lips beneath,  
Those Prairie's hard-bit sons,

As from man to man the catchword ran,  
"We'll have back the captured guns."

On that quest all bent at the foe they went,  
The lads of the great Far West,

Their blood on fire with a righteous ire,  
And they fought like men possessed.

One brief hot spell of loosened Hell;

Hell for the baffled Huns,

But a time was this of wild mad bliss  
To the Prairie's dashing sons.

They slew, were slain, yet knew no pain  
In the thrill of the breathless hour.  
When the big guns flash and the gunboats clash  
And you're gripped in the war-lust's power.  
And the Teutons fought as they should and ought  
All martial Deutschland's sons,  
But the Prairie breed were the men at need,  
And they had back their captured guns.  
Their faint resounds to the Empire's bounds,  
Lads of the grim Far West,  
Who saved the day in that breathless fray  
And bettered the foeman's best.  
And methinks that toe will now be slow  
To boast of his captured guns,  
While accounts are there and still to square  
With the pick of the Prairie's sons.

## Successful Annual Exhibition

With the change in the weather for the better, prospects for the Exhibition are exceedingly bright. Parties willing to enter could should note that the entrance fee is \$100.00 at the west end of the grounds so that the animals will not have to stand in the sun all day. The exhibitors other than live stock will be accommodated in the curling rink and additional attractions will be an exhibit from the Dominion Experimental Farm at Lethbridge City test in length, and a vehicle exhibition from the team from the Claresholm Demonstration Farm.

Everything is ready for a successful fair. While the rice programme is a small one as regards money, owing to the fact that the Directors of the Park Association felt they could not this year put up purses enough to any size in proportion to the amount of money received.

We trust that the results for the year will be as good as the year before.

With the news that the Nishnawasee Fair will open on Aug. 10th, we

will be glad to see the boys in town again and in time to help the Nishnawasee Fair along.

Rossmere and McFadden point after the game to the satisfaction of all. The score was eleven to three in favor of the Glen Briton.

The game was as follows:

Glen Briton      Clear Lake

B. Lepard      H. Christoferson

E. Eadie      H. C. Curvey

E. Lewis      S. P. Burg

E. Gibbie      E. Schumacher

E. Walker      S. Wyatt

F. Daly      E. Schumacher

F. Grinnell      E. Frederickson

CHAPTER XXIV.

Marions Double

Geoffrey was lying propped among the gorse on the cliff upland. He had a hole in his pocketbook, and he knew he was waiting for a rabbit. And he was silent out here, to think over the miseries of his life.

He was slightly puzzled and, on the whole, rather well pleased. What he had done was well planned. Telskorski taken high so far into the hills, he could not get at him at the critical moment? He was prepared to take his share of the dangers; but he had not done what had proved his steel.

It was not Marion again mysterious. The time might have gone more rapidly. They had refrained from meeting, and Geoffrey, after all, his elders knew best, would slip, a suspicious glance.

Then Geoffrey looked up suddenly. Some two hundred yards away he saw a horseman riding across the open glen. At the same instant two figures came into view. They were ladies and the sight of them caused Geoffrey, for it was not usual to see such women, to drop his gun and sheepdog or a dog at that spot.

The figures passed. They were plainly dressed, and Geoffrey, as he gazed at them, was sure they were as Geoffrey by these. He recognized one of them. Surely the tall lady, with her white hair, her simple grace, could be none other than Marion.

Geoffrey arranged his glasses. They were powerful binoculars and through them he could see the ladies' features quite plainly. He looked through them again long and earnestly. And then he saw Marion.

Just for an instant Geoffrey doubted the evidence of his senses. He hoped she was Marion, and he turned his eyes away. But he could not bear to look through them long and earnestly. His doubts could no longer be entertained.

It was Marion—Marion who had descended from the hill. She had the right to be here. Marion, who hated the sight of her. And here she was, walking with Mrs. May. Marion was something more than friends.

Yes, she was Marion. Marion, doubtless. She had adopted her white dress for reasons of blue; her sailor hat for reasons of fashion; her white gloves for reasons of her husband's sake.

She had come to him, to the man he had chosen to swear to. He let her down well indeed.

And for the time not another word would he say.

## CHAPTER XXV.

## Geoffrey in Puzzled

It was a long time before Ralph Marion spoke again. He remained silent, looking down at the floor. The same, it was not possible to mistake the graceful figure. Even without the glasses he could have been prepared to swear to her.

He lay low under the bushes. The two were in the same direction. Geoffrey did not want to listen, but somehow he could not resist. No power he could not resist. Nor yet could he resist the man he had chosen to swear to.

That is impossible, my dear Zazel, she said. "But you are safe."

"I am not safe, but I was in the rep." "And I'm only a pawn in the game."

It was Marion's voice; it was a same, yet not the same. It was a hoarse, strangled voice, the voice of a man who smokes to excess. Certainly Geoffrey was not prepared to swear to the man.

"Hazard, Zazel. Of course you know that we are all in together. And look at me, Marion. I am in pain."

The latter started like one who shudders unshakably under the weight of a blow.

"Oh, of course," he said. "I am fatigued, and yet you bring me everything."

"And yet you bring me the news of the greatest importance."

"That you know she should marry. The danger will not occur to me for it has been under my nose."

"Still, you might easily be forced for it."

Saying has nothing to do with it. And it is the gun that has won the day, humming in my ears for days and I shall never be able to hear again like Niagara. But, please, do not leave the danger."

The latter was still clinging to your confidence, in this matter.

At that moment Telskorski returned to town. No longer was he in the hills, but he had come to the direction.

Geoffrey did not want to listen, but somehow he could not resist. No power he could not resist. Nor yet could he resist the man he had chosen to swear to.

"I have just shown you the way," he said. "But not quite the same way."

"Because I did not know that for a fact. Where are the two so close at hand?"

(To be Continued)

## Prests on the Farm

Before forming a business or profession, the young man must be qualified in the highest and best sense, the profits arising from production and distribution being the chief reward shared by the household. Good breeds of livestock and the most approved methods of cultivation and management are a necessity on the farms.

The farms are built in the style of the French, the houses being erected from the absolute arrangement.

Geoffrey had not been Marions after all. A sharp, cold wind, which often blew from the north, had driven him to the south.

The young man, who had been hearing all that had been heard that morning, was seated in his room, smoking his pipe in his much, as if he had not news for you, and, "Geoffrey said as he entered the room.

He knew that directly I heard your step on the stair, I hope you have stumbled on some other farm."

"Well, that is for you to say. I saw Mrs. May. She came quite close to

me on the cliff. She had a companion. Who, I looked through my glasses and saw it was Marion."

"I didn't start. He merely smiled.

"I said to Marion, he said, 'Not our dear little girl!'

"Of course now. Since all that I had seen of Marion, I had known her when you never seen her.

I had my glasses and I could see her clearly. I had a good view of her, for she was waiting for a rabbit, and she was sitting out here, to think over the miseries of her life.

He was slightly puzzled and, on the whole, rather well pleased.

What he had done was well planned.

Telskorski taken high so far into the hills, he could not get at him at the critical moment?

He was prepared to take his share of the dangers; but he had not done what had proved his steel.

Then Geoffrey looked up suddenly. Some two hundred yards away he saw a horseman riding across the open glen. At the same instant two figures came into view. They were ladies and the sight of them caused Geoffrey, for it was not usual to see such women, to drop his gun and sheepdog or a dog at that spot.

The figures passed. They were plainly dressed, and Geoffrey, as he gazed at them, was sure they were as Geoffrey by these. He recognized one of them. Surely the tall lady, with her white hair, her simple grace, could be none other than Marion.

Then Geoffrey arranged his glasses. They were powerful binoculars and through them he could see the ladies' features quite plainly. He looked through them again long and earnestly. And then he saw Marion.

Just for an instant Geoffrey doubted the evidence of his senses. He hoped she was Marion, and he turned his eyes away. But he could not bear to look through them long and earnestly. His doubts could no longer be entertained.

Many a smart lad who has ruled his mother has found it a different proposition to govern a wife.

Sometimes a woman just wishes she could be as saucy and as independent as her maid and still retain her position in society and her husband.

When the cat is away the mice begin to play, and by the same token let it be said that when a woman is away her husband sometimes plays in his neighbor's back yard.

An exchange says, it is astonishing how some minds will hold out under continual drafts. It is said a female friend of its acquaintance has been giving a piece of her mind to most everybody for forty years, and yet the original plant remains.

Claresham

## SUPPORT YOUR HOME TOWN

house for donations towards improvements.

This town, in common with others, is periodically flooded with bills lists from various and distant sources sent to your shoulders. These houses send to you catalogues of cheap, flashy articles quoting presumably low priced goods. They solicit your business, offer you according to the catalogues, great bargains; but does it pay to send your money away for these cheap purchases? How many times have the goods purchased by this manner been over-priced than the goods you buy at home for almost the same price?

Your local dealer advertises in your local paper; does the mail order paper, the paper that you received? No because as long as the local dealers support the Review we do not need to accept their full page ads.

With the Review you get news for the local hospitals, for improvements and several other things; the merchant or the mail order house?

The merchant has to come across every time with the money, and the mail order house only sends more catalogues into the merchants territory to draw away his trade.

Did you ever write to a mail order

## PROFESSIONAL CARDS

Dr. R. M. Riggs  
RESIDENT DENTIST

8th Avenue Opp. Wilton Hotel

# BUTTER WRAPPERS

Must Be Printed or Branded  
According to New Dairy Act

Our facilities for the printing of Butter Wrappers are equal to any found in the province. In prices, considering the quality, we are the lowest. Unless the cheaper grades are desired our prices are always for wrappers made of the best grade vegetable parchment paper, printed with Special Brine Proof, Non-poisonous Butter Wrapper Ink. We can supply the cheaper and imitation grades but we do not recommend them because they do not give the best satisfaction.

**THE REVIEW**  
"Printers of Quality"

## LIBERAL ORGAN IS HIS DEFENCE

An Ontario "conservative" relies on the Brantford "Expositor" to support his position on "Made-in-Canada".

The "Made-in-Canada" movement came in for considerable discussion during the Budget Debate in the recent session of the House of Commons. One or two members criticised the movement as being entirely selfish and not in the public interest. Others, however, alone in the course of the debate Red Mr. Fisher, the member for North Braul, quoted the Brantford "Expositor," one of the leading Liberal papers in Western Ontario, in support of the policy of the Canadian government. After referring to the criticism of the "Made-in-Canada" movement, which had preceded his speech, Mr. Fisher stated that in his section of the Province of Ontario, which constituted an important industrial as well as farming, country, the people at all firmly believe in the movement.

"Not alone the artisans of Hamilton, Dundas, Brantford, Paris, Guelph, Berlin, Galt, Waterloo, Woodstock, Preston, and other manufacturing centres, but the merchants and farmers as well realize the importance of the "Made-in-Canada" movement.

The artisan knows that increased demand for Canadian-made goods means better work and wages for himself, and consequently more for his family; the merchant knows it means more and better business, while the farmer has learned

the value of the home market and knows that it means a better market for everything he has to sell. That view is shared by Liberals and Conservatives alike, and we have read a few short articles on this movement taken from the Brantford Expositor, the leading Liberal organ in the section from which I come, and I would commend these extracts to the hon. gentleman who has just taken his seat.

Credit for Canadians

On October 13, the Expositor published an article with the header "A good credit for Canadians," as follows:

"I believe in Canada."

I love her as my home,

I love her institutions,

I rejoice in the abundance of her resources.

I have unbounded confidence in the ability and enterprise of her people, and I cherish exalted ideas of her destiny among the nations of the world.

Anything that is produced in Canada, from Canadian materials, by the application of Canadian brain and labor, will always have first place in my estimation.

On November 4, 1914, it published another article, from which the following is an extract:

"To keep prosperity in Canada and the spectre of hard times out, just means that from now on the people of Canada must insist that the business of first importance, will spend their money for the goods made in Canadian factories. It's the importance of maintaining Canadian pay-roll that puts us all on the same level."

Again on January 30,

"The people are anxious to give preference in their purchases to goods that are the product of Canadian industry, but they must be made more familiar with the nature and uses of these articles. An educational campaign backed up by frequent exhibits in every city and town in the country of "Made-in-Canada" goods will do much to increase the activity of the manufacturing establishments of the Dominion."

Economic Epigrams

On February 9 the Expositor contained a number of economic epigrams, of which I will read two or three: "Now that the real estate soap bubbles have burst in the cities in this country we are again estimating the value of land by the number of smokers there. There's more money in the 'Made-in-Canada' habit than in the subdivision habit."

"Half the world does not know the other half lives, and half the other half don't care just as well as they don't care how the other half lives so long as they themselves keep them out of work by buying imported goods."

"These are clippings from the most prominent Liberal paper in that section of the country. I am sure that the members of this house will agree that the 'Made-in-Canada' policy has taken a strong hold on the people of Canada, and as the importance of the question is better understood, this hold will continue to grow."
